We recommend running InPrint 3 version 3.0.2 or above when using this pack. You can download a free update from downloads.widgit.com.

Notes on BSL SCIENCE UNIT 1E PUSHES AND PULLS

The resources downloaded in pdf format are ready to use on the screen, whiteboard or to print.

The resources downloaded in InPrint 3 files can be adapted and edited to choose alternative examples of items, or variations of signs or symbols from the extensive Widgit collection of Symbols.

The Let's Sign & Write BSL graphics pack has over 1400 general vocabulary of signs and the new Let's Sign & Write Science pack contains 720 science related signs to choose from.

The materials in this pack focus on the teaching of vocabulary relevant to the Science curriculum units. A variety of different formats are used to familiarize learners with the concepts, signs and words used in these vocabulary sets.

This Unit includes sign vocabulary for:

Different sorts of movement;

Push, pull, twist, spin, turn, swerve, hop, skip, turn, swing, slide.

Words to describe movements;

Speed, direction, move, fast, slow, start, stop.

Words linked to safety;

Watch, careful, danger, risk.

Fingerspelling is also a useful tool in teaching/learning vocabulary and regular practice in fingerspelling is strongly recommended to develop word recognition and reinforce the written word.

The pack contains files in various combinations – BSL signs with words and the Widgit Symbols give clear visual representation of the meaning in its context and signs with and without words provide variety of format.
