A PACK OF RESOURCES BY
CATHERINE REDMAYNE,
SPEECH & LANGUAGE THERAPIST

CHARTS

This pack offers a story to read about collecting information and 11 charts, 9 of which have a worksheet with questions of varying complexity. Suitable for Reception-Yr3 depending on ability level. Charts are accessible to nonreaders. Worksheet text has symbol support. For children with moderate learning difficulties, the worksheets can be the basis of 1-1 or small group extra teaching and discussion. Remember:

● Dyslexic children can access the worksheet text via the screen-reader in Communicate:In Print and complete the same worksheet as everyone else.

● You can adapt a worksheet by selecting and copying it to a blank landscape sheet; unlocking the content; and then deleting items which are too difficult. Save your file with a new name!

● You could also adapt your file to be an interactive IPS file.

A book with a class of 'virtual' children is part of the pack. This provides a readymade resource for gathering information to complete the children's charts. (The teacher can keep a completed set and she will know what the answers should be - this is more straightforward than using facts real children collect for themselves even if it is not so realistic!)

● Transport chart and worksheet

● Clothes chart and worksheet

● Animals chart and worksheet

● Foods chart and worksheet

● 2 Counting things we notice charts (look / listen)

● 5 Charts to fill in about a group of 'virtual' children described in Book 3

Filenames and desciptions are listed on page 2.

CHARTS

Users can pick charts relevant to curriculum work or children can be allowed to choose different charts. Each chart is self-contained (apart from those which need the children's cards for completion). All the worksheets have questions of varying complexity. The worksheets about the children are simpler than the others.

cr6-00 charts-instructions

     Outline and list of files.

cr6-01 charts story

     Story to read aloud before attempting chart work.

cr6-02 charts worksheets

     Contains the charts and associated worksheets:

- Transport chart and worksheet
- Clothes chart and worksheet
- Animals chart and worksheet
- Foods chart and worksheet
- 2 Counting things we notice charts (look / listen)
- 5 Charts to fill in about a group of 'virtual' children, counting:
- eye colour
- travel to school
- pets
- sports
- instruments

Each with a worksheet.

cr6-03 childrens data

     Contains the children, each with a fixed format description so the charts about them can be completed. Reading skill required is minimal as there is symbol support for key words.
