

## Instructions

These cards can be used in a number of ways, to help players learn more about the countries in the Women's Euro 2025:

- **Classic trading game:** Player chooses one of the yellow or green sections (e.g. population in millions). This number is compared with that of the other player - the player with the highest number wins.\*
- **Challenge variation:** Player who won the card can offer the losing player the chance to win the card back - can they say one or both of the blue facts for the winning country - e.g. a player with France has beaten a player with Wales, they offer them the chance to win their card back: "I have France, what is my capital city and language?"
- **Simplified variation:** Player has to guess one or both of the blue sections relating to a given country, to win the card.
- **Open challenge:** Give the players the packs of cards and ask them to create their own games.

\*When comparing Fifa Rank, players may decide that the lowest number wins.

## Finland

Capital City:

Helsinki

Language:

Finnish,  
Swedish

123,000

Population  
in Millions:

6

Euro Cup  
Appearances:

4

FIFA Rank:

25
